

RFID & Smart Packaging

Raghu Das*

Keywords: RFID, Technologies, Packaging

Abstract:

Learn about RFID technologies how they work, and the pros and cons of these different options. Learn who is using them, the benefits they are achieving, and the wide range of applications providing unprecedented levels of asset information and visibility. This presentation also covers the opportunity for the combination of RFID and MEMS to monitor item condition, and the dramatic consequences of this knowledge.

Note: This manuscript was not received in time for publication in the *2003 TAGA Proceedings*.
