

A NEW CONCEPT FOR AN OFFSET PRESS--  
THE ULTIMATE FOR PROOFING

George Zurbrugg\*

Abstract: Offset Proof Press - F.L.A.G. "Speedproof" 4C, printing size 28 inches x 41 inches. This sheet fed, 4-color offset proof press has fully automated feed and delivery, with 4 printing units arranged around a common large counter impression cylinder. The "Speedproof" also has automatic ink fountains with remote color control system allowing density adjustments within 1 3/8-inch zones. The color profile is shown on a TV screen. The press is equipped with Dahlgren dampening units.

Presented at TAGA 1982 Toronto, May 18, 1982.

(The complete paper was not released for publication in time to meet the production deadline for this volume. It will be considered for publication in a future issue of TAGA Proceedings.)
